Information for Authors

Aims and scope
The journal exists for the publication of experimental and theoretical investigations in the field of chemistry and chemical technology. Among the subjects emphasized are: the achievements and prospects for the future; the present state of art and development of chemical production; materials for future and nontraditional chemical technologies; chemistry and ecology problems.

Submission of papers
Authors should submit three copies of their manuscript and a DISK CONTAINING THE ELECTRONIC VERSION (electronic version authors can send by E-mail) to the Editor:

EDITOR
Z.A. Mansurov
al-Farabi Kazakh National University,
Karasai Batyr Str., 95, Almaty, 480012, Kazakhstan.
Tel. (3272) 92-43-46
Fax (3272) 92-58-11
E-mail: chemtech@kazsu.kz

Contributions are accepted on the understanding that the authors have obtained the necessary authority for publication. Submission of a manuscript implies that it is not under consideration for publication elsewhere and further that, with the exception of review papers, original work not previously published is being presented. All communications must indicate the name and full postal address of the author to whom proofs should be sent. This author is responsible for informing all co-authors that the manuscript has been submitted to this journal. Upon acceptance of an article by the journal the author (s) will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Manuscript preparation

Length
Not more 15 (reviews-30 pages) pages, including figures and tables. A Brief Communication, Comment of Reply should not exceed 15000 words, including tables and figures at 200 words equivalent each.

Style
Full-length articles should be organized as follows: Title Page, Abstract, Nomenclature (if used), Introduction, Main Body, Conclusions, Acknowledgements, References, Appendices, Tables, List of Figures and Figures. Brief Communications have a similar organization but they do not have an abstract and they generally do not have a separate Conclusions section because their scope is limited.

Format
Manuscripts must be in English and typed single sided and double-spaced on 210x297 mm (A4) white paper with ample margins. The title page, tables and figures captions should be typed as a separate page.

Title Page
The Title page should include title, author(s), affiliation(s), the type of article (full-length, Brief Communication, etc.), and the complete address of the corresponding author (address, telephone number, fax number, and e-mail address). If the title is long, a shortened running title having no more than 45 characters and spaces should be provided.

Abstract
A one-paragraph abstract of 250-300 words should be submitted with full-length articles.

Nomenclature
If symbols are used extensively, a nomenclature list arranged alphabetically, with subscript and superscript symbols listed separately, should be provided. Otherwise symbols should be identified when first used in the text.

Abbreviations
Abbreviations of chemical compounds or other acronyms that might be confusing to the reader should be written in full at their first mention with the abbreviation in parentheses.

Units
Authors are encouraged to use the SI system of units.

Uncertainties
A quantitative statement of experimental uncertainties should be provided in all manuscripts reporting new experimental results. A systematic assessment of numerical errors should be provided in all manuscripts containing numerical solutions.

Mathematics
Typewritten letters, numbers, and symbols should be used for mathematical material wherever possible. Use fraction
exponents instead of root signs. Use the solidus (/) for simple fractions.
Numbers that identify mathematical expressions should be enclosed in parentheses and should be numbered consecutively beginning with "1" in the text. Refer to equations in the text as "Eq. 1," etc., or "Equation 1," etc., at the beginning of a sentence.

Footnotes
Footnotes to the text should be indicated by superior Arabic numerals, numbered consecutively throughout the manuscript.

References
References should be indicated in the text by full-size numbers in brackets, e.g., [1], and should be numbered in the order cited. The numbered reference list at the end of the article should conform to the following style (underlining can replace italics):

**Conference Proceedings:** A conference proceedings should be styled as a book, with publisher or institution sponsoring publication and the year published as well as the year the conference was held.

Tables
Tables should be numbered consecutively with Arabic numerals. Footnotes to tables should be indicated by superior letters, beginning with "a".

Illustrations
Line drawings should be prepared with black ink on good contrast paper or as glossy prints of originals. Photographs should be used sparingly and originals should be glossy prints. Essential color figures may be included but at extra expense to the author(s); contact the production editor for details.

Each figure should have a caption and a list of figure captions should be typed on a separate page which precedes the figures at the end of the manuscript. The figure number and author(s) name should be written in the margin or on the back on each figure. Figures should be numbered consecutively, beginning with "1", in the text. Refer to figures in the text as "Fig. 1," etc., or "Figure 1," etc., at the beginning of a sentence.

Language
Papers must be written in English. Where necessary, language correction will be done by the Publisher.

Disk submission
The preferred storage medium is 3½ inch disk in MS-DOS or MS-DOS compatible format.

Text
We can accept most word-processing formats, (ideally Microsoft Word). Most formatting codes will be removed or replaced on processing your article so there is no need for you to use excessive layout styling. In addition, do not use options such as automatic word breaking, justified layout, double columns or automatic paragraph numbering (especially for numbered references). However do use bold face, italic, subscripts, superscripts etc.

When preparing tables, if you are using a table grid, please use only one grid for each separate table and not a grid for each row. If no grid is being used, use tabs to align columns not spaces.

Do not import the Figures into the text

Graphics

TIFF, JPEG or EPS files are preferred.
Try to create your graphics near to the size they will be finally printed at by looking at previously published manuscripts. This will help with the lettering and resolution of your files, as the resolution will be lost if we have to enlarge a file and lettering may need re-keying if the file has to be reduced significantly. The final font size should be about 6-8 pt.
Always use the standard Adobe set of fonts.
If it is necessary to compress your electronic files, please indicate the software used.

Reprints
Authors will receive electronic versions of their papers in *.pdf format file being full journal edition instead reprints.
