

## Editorial

This volume is the inaugural issue of the Eurasian Chemico-Technological Journal (EACTJ) in the new millennium and marks the completion of 2 years of its publication as the international journal for dissemination of technical and scientific literature on the Chemistry and Chemical Technology. Today the Eurasian Chemico-Technological Journal is a widely circulated serial. Well-renowned researchers from many countries of Asia and Europe contribute the papers published in this Journal. It is abstracted in the "Chemical Abstracts" and Russian Referativnyi Zhurnal "The Chemistry".

The Eurasian Chemico-Technological Journal originated to provide a publication vehicle for those not only interested in the chemistry and chemical technology aspects, but also those interested in the physics and kinetics of such chemical processes as plasma chemistry, combustion, oxidation etc.

The EACTJ pioneered quality printing, an attractive format, free reprints and reviewed issues, which concentrated on special topics and conferences.

Next issue (No2, 2001) will be devoted to the International Conference on the actual problems of petrochemistry, which has been held in April 2001 in Moscow. Nowadays is the time of Clean High Technologies and in this connection our Journal is calling especial attention of the authors on the priority of the papers relative to these concerns.

The Editors of the EACTJ wish to encourage quality contributions on all aspects of Chemistry and Chemical Technology and manuscripts from industry; research institutes and universities will be received with equal enthusiasm.

We welcome the papers contributed to the EACTJ through Internet facilities. The Internet has made practically all information readily and universally accessible in a short time scale, and has diminished appreciably in many fields the time from research concept to bringing a product to the market, thus, satisfying current and future economic, environment or society needs.

On behalf of the Editors of the Eurasian Chemico-Technological Journal we would like to acknowledge the assistance of all scientists and engineers, representatives of Government, public and industry for their valuable contribution to prepare, selection, collection, review of the articles and express the best wishes of further successful work.

**Zulkhair A. Mansurov,  
Editor-in-Chief, EACTJ**
